CYRA

PHARMA & LIFE SCIENCES
SHARED R&D LAB WORKSTATIONS

Cybersecurity operations (OT SecOps) platform for R&D labs

Shared devices. *Accountable science.*

Identity, accountability and traceability for shared-account lab sessions.

Device use
Who used the device at a given time?

Raw data ownership
Which raw data belongs to which user?

Session context
What activity and data are linked to the session?

6 PRODUCTS. ONE PLATFORM.

Access
Authenticate the person
PIN, badge or Azure AD
IN EVALUATION

Log
Record session activity
Basic logs + premium e-logbook*
BASIC IN EVALUATION

Trace
Map session metadata
Application usage + data folders
IN DEVELOPMENT

Vault
Secure local session data
Control who can open each file
IN DEVELOPMENT

Track
Learn session signatures
For each user and device
IN DEVELOPMENT

Aura
Detect anomalies
Flag deviations for investigation
IN DEVELOPMENT

*Log (premium), including the e-logbook, is in development.

THE CYRA FOCUS

Continuous work. Connected session context.

A vendor-agnostic workstation identity layer, expanding into application/data context, local file control and user/device intelligence. These extensions are in development.

Calira LabTrack: booking and usage. **Imprivata:** enterprise access and transparent locking.[3]

17.5%

of surveyed organisations believed already NIS2-compliant.[1]

WHY NOW: EU NIS2

NIS2 covers all operations of in-scope entities, including non-GxP labs. Cybersecurity controls must address risks across the systems they use, with measures proportionate to risk.[2]

CYRA supports relevant controls and evidence. Compliance depends on scope and implementation.

See CYRA in your lab workflow.

Demo or evaluation: **ABRA Solutions AB** | info@cyrasystems.com

CYRA is a project code name. The trademark name will be announced soon.
